

LAB Assignment #6, for ECE 338

Assigned Oct 15th

Due Oct 17th

Description: Create an SDK project.

Use Vivado to create a project, add the block diagram as discussed in lab5 and then create an application in SDK and import the C file I have provided on my website for this lab. Follow the screen cast instructions.

Turn in a screen snapshot of SDK after you create the project.

This lab is worth 10 points.
