Hear Ye! Hear Ye!

Notable Authors Spring 2015

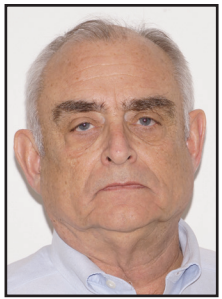
SUMMA
FOUNDATION

Edl Schamiloglu, President

Compiled at The University of New Mexico, Dept. of Elec. & Computer Engineering
211 Terrace St. NE • 1 University of New Mexico, Bldg. 46 • MSC01 1100
Albuquerque, New Mexico USA 87131-0001

A. Bhattacharya

Everett G. Farr



Robert L Gardner

François Issac

Isabelle Junqua

C. Kasmi

J. Lopes-Esteves

Gaspard Luigrin

Nicolas Mora

D. C. Pande

J.P. Parmantier

Frank Peterkin

Wilfrid Quenum

Farhad Rachidi

M. Renard

Marcos Rubinstein

Dhiraj K. Singh

Felix Vega

Uploaded to www.ece.unm.edu/summa/notes on Jan. 5, 2014:

SDAN 41 *Study and Classification of Potential IEMI Sources,* **Nicolas Mora, Felix Vega, Gaspard Lugrin, Farhad Rachidi,** July 2014

SDAN 42 *High Power Microwave Applications,* **Dr. Frank Peterkin, Dr. Robert L. Gardner,** December 2014

SDAN 43 *RF DEW Scenarios and Threat Analysis,* **Dr. Frank Peterkin, Dr. Robert L. Gardner,** November 2014

SDAN 44 *Automation of the Immunity testing of COTS computers by the instrumentation of the internal sensors and involving the operating system logs,* **C. Kasmi, J. Lopes-Esteves, M. Renard,** November 2014

IN 625 *Application of Electromagnetic Topology and Power Balance Concepts to Radio Frequency Couplings into Buildings,* **I. Junqua, J.P. Parmantier, F. Issac, W. Quenum,** October 2014

SSN 564 *A Power Wave Theory of Antennas (Fourth Revision),* **Everett G. Farr,** December 2014

SSN 568 *Improved Extinction Pulse method for Automated Radar Target Discrimination,* **Dhiraj K. Singh, D.C. Pande, and A. Bhattacharya,** December 2014

SSN 569 *Examples of the Power Wave Theory of Antennas,* **Everett G. Farr,** December 2014

Carl E. Baum as a young man

Dear Members of the HPE Community,

We finally made it: my first upload as Notes Editor!

I set some goals in my AMEREM talk "History of the Notes" to increase non-US participation. We got that with Notes from France (two), India and Switzerland. The US contributed four Notes for a total of eight for the upload. Three were SDANs and three were SSNs indicating an increasing emphasis on systems analysis.

Dave Giri also also provided two Memos documenting the participation and the last EUROEM and AMEREM meetings.

The review process was not without controversy. In the AMEREM lecture, I described the Notes as a "Beginning." I don't believe the Notes will survive as yet another IEEE clone, so how can we do things differently?

Carl always described the Notes, as well as the Electromagnetics Meetings, as a place to discuss work in progress — not necessarily finished work. *That means that we can make some mistakes and debate the issue in the Notes.* The standard journal process would confine that debate to a few reviewers and editors. I believe that we all can learn from technical debate and we should have that debate in the Notes themselves, as well as at the Electromagnetics Meetings.

It takes a strong belief in one's ideas to have such a debate in public. We had such a debate from the review of one of the candidate Notes (it is still ongoing). The authors and the reviewers decided to settle their differences in private and I believe we all lost in that process.

Robert L Gardner, Chief Editor **Robert.L.Gardner@verizon.net • Blitz32Schreiber@gmail.com**

Manuscripts should be e-mailed to Dr. Gardner (Robert.L.Gardner@verizon.net) for consideration. It is the responsibility of the author(s) to get the paper cleared for public release. The Notes will be regularly uploaded to www.ece.unm.edu/summa/notes. The announcement of newly published notes will be sent out to subscribers twice a year by postcard. You can be added (at no cost) to this postcard notification mailing list by e-mailing Chuck Reuben at shawnee@unm.edu. All Notes should be cited by mentioning, Author(s), Title, Name and Number of the Note, the Date of publication and the URL from where it can be accessed. ***"All published Notes are approved for public release and their distribution is unlimited."***

Potential contributors to the NOTE series can adapt their material and submit it to other journals, such as the IEEE Transactions on Antennas and Propagation, EMC etc. and should abide by all IEEE editorial policies.
